

## **HexaWare:**

- Get window handle return type
- Get window handles return type
- Find element and findElements return type
- Dry run Cucumber
- Oops Concepts
- Abstraction, interface usage in project
- Duplicate element find in a string (Mistake used two copies of a string)
- Where we use get window handle and Get window Handles
- Maven explanation
- Api automation
- Exception vs assertion.
- Exception handling vs assertion

## **CareStack:**

- Anagram program
- Reverse a number
- joins sql
- Patch put
- Soft assertions
- Three assertions there
- line 1 assertion passed
- line 2 assertion failed
- line 3 assertion failed test will pass or Fail
- Hard assertions
- status code (500 meaning)
- xpath
- project structure
- selenium limitations, disadvantage
- TestNg advantage
- Test coverage covered in test suite
- Greatest neighbour program

## **GSR Business Limited**

- 
- Exception Base class
- Find middle element of a string
- Reverse a string
- How to start test automation Entry criteria
- Git commands
- How to populate a text in a text box selenium (Send keys)
- What is javascript Executor
- frames= how to navigate to next frame -which method we should use
- Involved in test planning, execution, automation
- What is package and its usage

- Odd Even program
- staleElement Reference Exception
- Listeners used in project
- Client round:
- Cucumber keywords
- When regression stops, when smoke stops
- Segregate array into odd,even element array(not printed as a array -mistake)
- To perform action which keyword will be used in cucumber(when)
- What is BDD
- Will u do framework development
- What is cucumber
- Assertion in cucumber

Wingify:

- Palindrome string
- Find non repeated characters
- Find id from List of Maps -done mistake in jsonpath  
And Looping through elements
- 500 server Error what will u do
- Explain project structure
- How to Segregate Type of Tests (using Tags)
- How you are running Test suite -cucumber
- How to perform Parallel run - using Scenario outline cucumber
- Maven commands(Life cycle)
- TestNg concepts
- Write a xpath - where ending always dynamic Id(beginning) is static  
-(contains used)
- Tell me Test case for text box and submit button
- Why u are using HashMap
- Why we are storing getWindowHandles in a Set<String>
